Key Findings

- Published three reports in 2014/15: *Owl River Riparian Restoration and Enhancement Project: Monitoring Report I; Abundance and Distribution of Bull Trout in the Muskeg River Watershed, 2014;* and *Distribution of Sport Fish in the Waterton River Tailwater, Alberta, 2014.*
- Reports were delayed until 2016 because of time requirements on staff for aeration work.

Introduction

Our resource programs (Fisheries, Wildlife and Land Management) are responsible for submitting reports every year on the projects they have been working on to describe the findings of the work. Communications is responsible for editing, proofing and formatting these reports and making sure they are available to the public and our stakeholders and partners through our website and the Alberta Government Library.

Methods

We edited, proofed and formatted reports from our resource programs. We then posted them on our website and submitted copies to the Alberta Government Library.

Results

Three reports from 2014/15 were posted on our website and sent to the Alberta Government Library. These reports include *Owl River Riparian Restoration and Enhancement Project: Monitoring Report I; Abundance and Distribution of Bull Trout in the Muskeg River Watershed, 2014;* and *Distribution of Sport Fish in the Waterton River Tailwater, Alberta, 2014.*

Some reports were delayed until 2016 because of time requirements on staff for aeration work.

Conclusions

Once published, our project reports inform the public and our stakeholders about the results of our fish, wildlife and habitat studies; recognize the efforts of our staff and the support of our contributing partners, and increase the public's recognition of ACA as a valuable conservation organization in Alberta.

Communications

- Posted reports on our website.
- Sent copies of the reports to the Alberta Government Library.
