

LANDOWNER HUNTER ACCESS SURVEY

Objective:

To examine the views and concerns of private landowners in Alberta on issues that may limit or prohibit public access for hunting.

This voluntary, online survey contained 68 questions and was active for 82 days (January 8, 2021 to March 31, 2021). The survey was advertised through various social media, publications, and websites of agriculture industry partners and county offices as well as rural newspapers and Alberta Conservation Association social media accounts. Results represent survey respondents who completed the online survey and due to bias may not hold true for the general population of landowners across the province. This survey was focused on private land and did not include questions about leased public land.

We are grateful for the landowners that took the time to complete the survey.

Please visit <u>https://www.ab-conservation.com</u> for additional survey information.
