## Lake: Long Lake

### Introduction:

Long Lake is located approximately 360 km north of Edmonton, Alberta. Test netting took place from June 10 - 13, 2000. The lake is home to natural populations of walleye, northern pike, yellow perch, lake whitefish, cisco and burbot. Fishing pressure on the lake is in the form of angler harvest, commercial harvest, and domestic harvest.

### Methodology:

A total of 10 sites were sampled on Long Lake (Figure 1). The lake was sampled according to the small, shallow lake (<1000ha, <10m depth) protocol of the Lake Monitoring Program methodology (Wilcox et.al 2000).

### Results:

As follows:

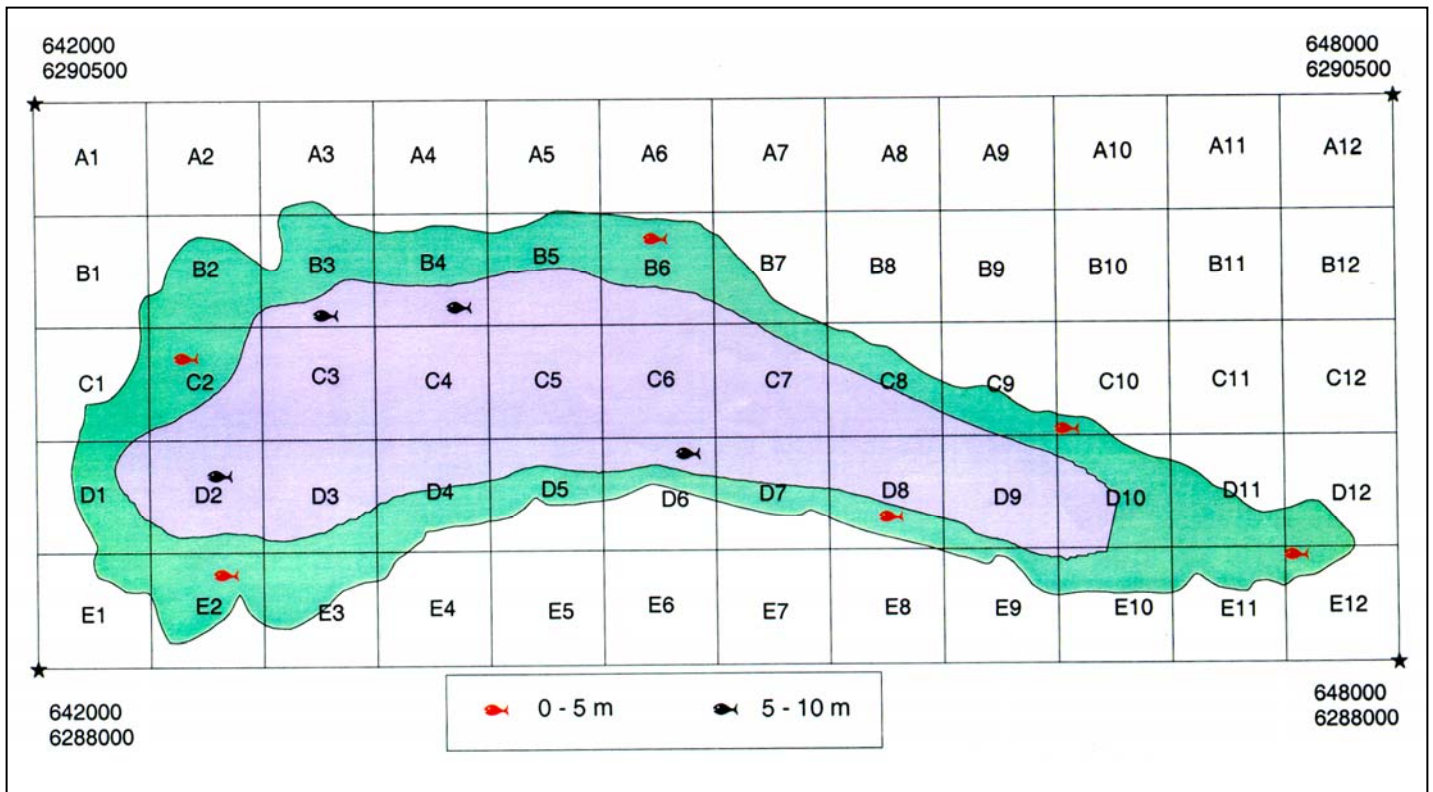

Figure 1. Map of Long Lake, showing test netting sample sites, June 2000.
