Lake: Round Lake

Introduction:

Round Lake is located approximately 360 km north of Edmonton, Alberta. Test netting took place from June 6 - 9, 2000. The lake is home to natural populations of walleye, northern pike, yellow perch, lake whitefish, cisco and burbot. Fishing pressure on the lake is in the form of angler harvest, commercial harvest, and domestic harvest.

Methodology:

A total of 10 sites were sampled on Round Lake (Figure 1). The lake was sampled according to the small, shallow lake (<1000ha, <10m depth) protocol of the Lake Monitoring Program methodology (Wilcox et.al 2000).

Results:

As follows:

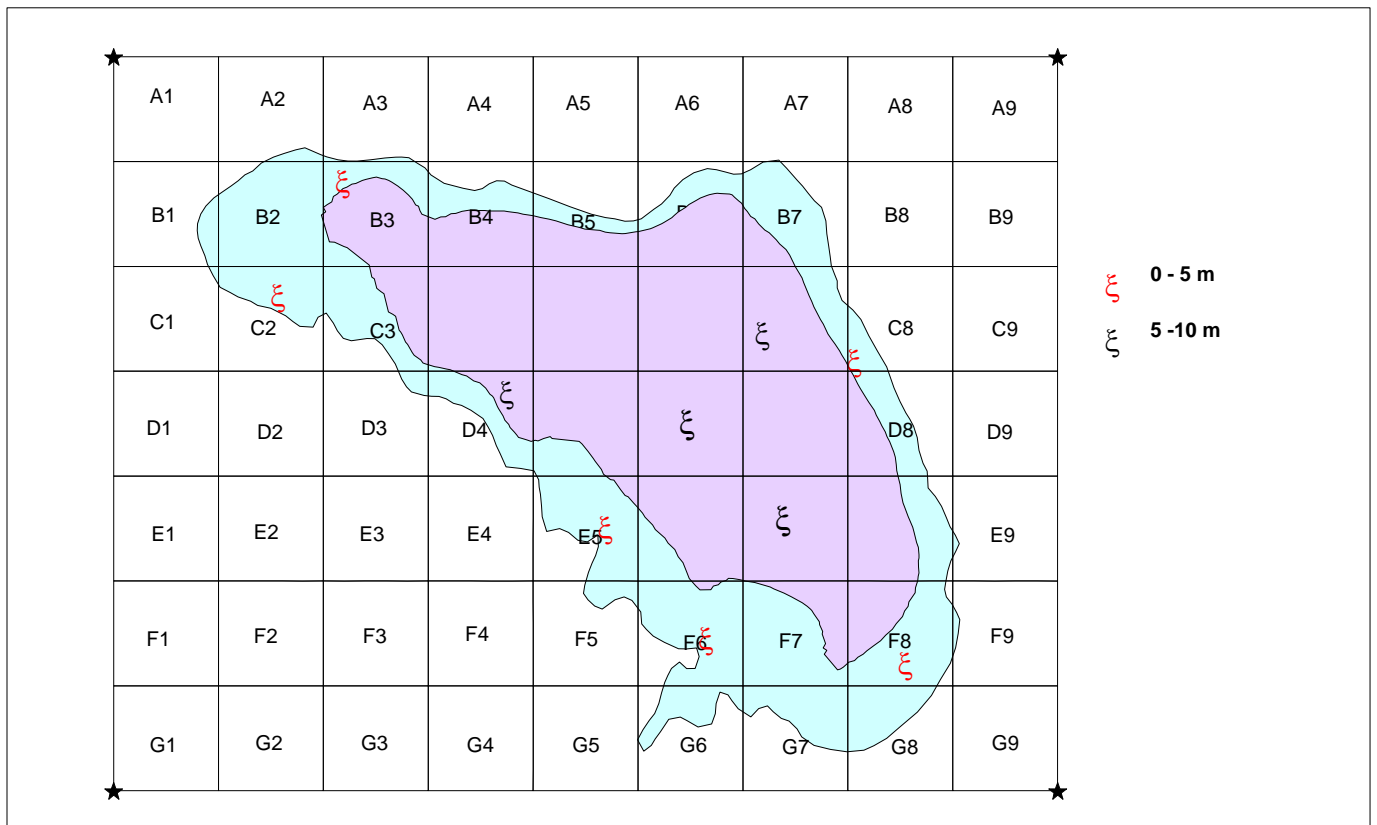

Figure 1. Map of South Wabasca Lake, showing test netting sample sites, August 2000.
