## EXECUTIVE SUMMARY

## Unaided Awareness

Two percent (2\%) of Albertans are able to name Alberta Conservation Association as an active conservation organization on an unaided basis.

Albertans most frequently recall Ducks Unlimited Canada (25\%), followed by Greenpeace (8\%) and World Wildlife Fund (6\%) as top-of-mind active conservation organizations that operate in Alberta. Other organizations are mentioned by $3 \%$ or fewer respondents.

## Aided Awareness

Awareness of Alberta Conservation Association increases from 2\% on an unaided basis to 45\% awareness when aided. This makes ACA the second most recognized conservation organization of the nine presented.

Aided awareness is highest for Alberta Fish and Game Association (80\%), at a little less than twice the proportion of awareness of the next highest organization (ACA at 45\%).

A range of $22 \%$ to $30 \%$ of respondents are aware, on an aided basis, of:
$\checkmark$ Trout Unlimited Canada (30\%);
$\checkmark$ Alberta Hunter Education Instructors Association (31\%);
$\checkmark$ Alberta Trappers Association (29\%); and
$\checkmark$ Alberta Professional Outfitters Society (22\%).

Fewer Alberta residents are aware (aided) of the Federation of Alberta Naturalists (14\%), the Foundation for North American Wild Sheep (8\%) and Pheasants Forever (8\%).

## Perceptions of Conservation Organizations

Ducks Unlimited Canada garners the highest performance ratings in terms of their conservation work, with the great majority ( $82 \%$ ) of those aware of the organization providing good $(4,5,6,7)$ ratings, including more than half $(52 \%)$ who provide very good $(6,7)$ ratings.

Two thirds (67\%) of respondents aware of the Alberta Hunter Education Instructors Association believe it is doing well (4,5,6,7 ratings) in terms of its conservation work, with almost four-in-ten (37\%) providing top-box $(6,7)$ ratings. Two-thirds $(67 \%)$ of those aware believe that the World Wildlife Federation is doing well $(4,5,6,7$ ratings) in terms of its conservation work, with equal proportions providing moderate $(4,5)$ and topbox $(6,7)$ ratings.

Half to two-thirds (a range of $49 \%$ to $65 \%$ ) of respondents aware of the following organizations provide good $(4,5,6,7)$ ratings, with responses tending towards more moderate $(4,5)$ than top-box $(6,7)$ ratings, on the conservation work of:

```
\checkmark Pheasants Forever (65%);
\checkmark Foundation for North American Wild Sheep (64%);
\checkmark ~ A l b e r t a ~ F i s h ~ a n d ~ G a m e ~ A s s o c i a t i o n ~ ( 6 2 \% ) ;
\checkmark ~ A l b e r t a ~ C o n s e r v a t i o n ~ A s s o c i a t i o n ~ ( 6 1 \% ) ;
\checkmark Trout Unlimited Canada (57%); and
\checkmark Federation of Alberta Naturalists (49%).
```

Forty-three percent (43\%) provide good (4,5,6,7) ratings for Alberta Trappers Association, with fifteen percent $(15 \%)$ providing very good $(6,7)$ ratings. Forty-two percent $(42 \%)$ provide good $(4,5,6,7)$ ratings for Alberta Professional Outfitters Society, with one-in-ten providing very good $(6,7)$ ratings (11\%).

## Perceptions of Biggest Conservation Issues

When given a choice of four wildlife conservation issues and asked to pick one which they believe is the biggest issue in Alberta at this time, Albertans most frequently select loss of native wildlife habitat (60\%), followed by wildlife diseases (11\%), over hunting (11\%) and lack of wildlife research (9\%).

When given a choice of four fish conservation issues and asked to pick one which they believe is the biggest issue in Alberta at this time, over half ( $56 \%$ ) of Albertans believe pollution of lakes, and rivers is currently the biggest issue affecting fish conservation in Alberta, followed by reduced stream flows due to over allocation of water ( $18 \%$ ), over fishing ( $10 \%$ ) and lack of fisheries research ( $7 \%$ ).

## Support for Outdoor Activities

Eight-in-ten or more Albertans support (4,5,6,7 ratings), with approximately half or more strongly supporting ( 6,7 ratings), the following outdoor activities:
$\checkmark$ Hiking ( $93 \%$ support, including $76 \%$ strongly support),
$\checkmark$ Nature photography ( $89 \%$ support, including $73 \%$ strongly support),
$\checkmark$ Canoeing ( $88 \%$ support, including $67 \%$ strongly support),
$\checkmark$ Bird watching ( $86 \%$ support, including $65 \%$ strongly support),
$\checkmark$ Horseback riding (85\% support, including $58 \%$ strongly support),
$\checkmark$ Berry picking (85\% support, including $57 \%$ strongly support),
$\checkmark$ Dog walking (85\% support, including $64 \%$ strongly support), and
$\checkmark$ Catch \& release fishing (82\% support, including $55 \%$ strongly support).

Three-in-ten or fewer Albertans strongly support (6,7 ratings) the following outdoor activities:
$\checkmark \quad$ Catch \& keep fishing (70\% support, including 29\% strongly support),
$\checkmark$ Plant collection (66\% support, including 29\% strongly support),
$\checkmark$ Motorized watercraft use (65\% support, including $27 \%$ strongly support),
$\checkmark$ Game bird hunting (52\% support, including $24 \%$ strongly support),
$\checkmark$ Big game hunting (50\% support, including 25\% strongly support),
$\checkmark$ Off-highway vehicle use (49\% support, including $19 \%$ strongly support), and
$\checkmark$ Trapping (42\% support, including $16 \%$ strongly support).

## Participation in Outdoor Activities

Almost three-quarters (72\%) of respondents indicate participating in hiking in the past 12 months, followed by nature photography (52\%), bird watching (47\%), berry picking (45\%), fishing (33\%), canoeing (25\%), plant collection (14\%), hunting (13\%), and trapping (1\%).

## Participation in Hunting/Fishing

Respondents who mention having participated in hunting in the past, but not as recent as in the past 12 months, were asked to give reasons for not having participated in hunting recently. Respondents most frequently mention loss or change of interest (34\%) as the number one reason for not participating in hunting in the past 12 months, followed by lack of time (21\%), that they do not believe in or like or support hunting (14\%), age (12\%), regulations (6\%), they no longer own guns or don't have or like guns (6\%), health (4\%), no or expired license or struggle to get license (4\%), and issues with accessibility to the location (4\%).

Albertans most frequently mention lack of time (35\%) as the number one reason for not participating in fishing in the past 12 months, followed by loss of interest ( $27 \%$ ), age ( $7 \%$ ), no equipment/boat (5\%), issues with location or accessibility (5\%), health (4\%) and regulations (4\%).

## Options to Improve Hunting/Fishing Experience

Almost seven-in-ten (69\%) Alberta hunters and fishers provide likely (4,5,6,7) ratings including approximately four-in-ten (43\%) very likely (6,7 rating) to have better hunting/fishing experience if provided with more opportunities near their home, followed by more areas with reduced vehicle access (63\% likely, including 24\% very likely), lower cost licenses or tags (58\% likely, including 32\% very likely), longer seasons (57\% likely, including $30 \%$ very likely) and higher bag limits (40\% likely, including 15\% very likely).

## 1 BACKGROUND

In October 2011, Leger Marketing Alberta was contracted to conduct telephone interviews with residents across Alberta to assess perceptions of various conservation issues affecting the province. This study follows similar studies which were conducted in May 2008 and September 2009. A total of 1,202 telephone interviews were completed with Albertans within four geographic regions, including the Edmonton CMA, the Calgary CMA, northern rural Alberta, and southern rural Alberta.

Specific objectives of the research were to:
$\checkmark$ Assess awareness of active conservation organizations that operate in Alberta;
$\checkmark$ Measure perceptions of the performance of the conservation organizations that operate in Alberta;
$\checkmark$ Measure support for, and participation in, various outdoor activities;
$\checkmark$ Determine perceptions of the biggest issues facing conservation in Alberta; and
$\checkmark$ Gauge potential to increase public participation in certain outdoor activities.

## 2 METHODOLOGY

### 2.1 SAMPLING PLAN

A total of 1,202 telephone interviews were completed between September $28^{\text {th }}$ and October $8^{\text {th }}, 2011$ with randomly selected Albertans within four geographic regions, including:
$\checkmark 300$ interviews in Edmonton CMA;
$\checkmark 301$ interviews in Calgary CMA;
$\checkmark 300$ interviews in northern rural Alberta; and
$\checkmark 301$ interviews in southern rural Alberta.

### 2.2 QUESTIONNAIRE DESIGN

The version of the questionnaire used for this study has been slightly refined. Leger Marketing worked in conjunction with the Alberta Conservation Association to create the original questionnaire in May 2008 as well as make revisions to the 2011 questionnaire. Changes are as follows:
$\checkmark$ The specification of activities occurring on provincial crown land or lakes/streams was removed from questions $4 \& 7$, and
$\checkmark$ The activity of "botanical collection" is now referred to as "plant collection" in questions 4 and 7.

A copy of the questionnaire is provided in Appendix A.

### 2.3 ANALYSIS BY SUBSEGMENTS OF THE POPULATION

To evaluate differences or similarities in responses between subsets of the population, the results for each question have been analyzed by:
$\checkmark$ Region (Edmonton CMA, Calgary CMA, rural north, and rural south);
$\checkmark$ Gender; and
$\checkmark$ Age.
Meaningful differences in responses from these sub-segments of the population are highlighted throughout the report.

Results are weighted by gender and age according to 2010 estimates provided by Statistics Canada.

### 2.4 ANALYSIS OVER TIME

Studies on this topic have been conducted for Alberta Conservation Association by Leger Marketing on three occasions (May 2008, September 2009, and October 2011). Using the combined data, meaningful differences in responses over time are highlighted throughout this report.

The study conducted in September of 2009 was a smaller scale Omnibus study conducted with Albertans in all regions of the province. It consisted of three questions, which represent a subset of the larger surveys:
$\checkmark$ Question 1: measuring the unaided awareness of various active conservation organizations in Alberta,
$\checkmark$ Question 2: measuring the aided awareness of the Alberta Conservation Association, and
$\checkmark$ Question 4: measuring the support for four outdoor activities (catch and release fishing, catch and keep fishing, game bird hunting, and big game hunting).

### 2.5 STATISTICAL RELIABILITY

For a given sample size, it is possible to set what are called "confidence bounds" or limits around an observed percentage and assert that such limits are correct 95 percent of the time (for example). These confidence limits are valuable indicators of the reliability of observed results. When interpreting data, confidence bounds should always be kept in mind because these limits can vary dramatically depending on the sample size.

Overall results, at a sample size of 1,202 , are accurate to within $\pm 2.8$ percentage points, 19 times out of 20.

Regional results, at a sample size of 300-301 in each Edmonton CMA, Calgary CMA, northern rural Alberta, and southern rural Alberta, are accurate to within $\pm 5.7$ percentage points, 19 times out of 20 .

A table of confidence bounds is included in Appendix C.

### 2.6 INTERPRETATION OF SCALES

Throughout the questionnaire, seven-point scales are used by respondents to rate their:
$\checkmark$ Perception: 1 = Very poor; $4=$ Good; and $7=$ Excellent
$\checkmark$ Support: 1 = Do not support at all; $4=$ Support; and $7=$ Completely support
$\checkmark$ Likelihood: 1 = Not at all likely; $4=$ Likely; and 7 = Very likely

For the purpose of analysis and discussion the various numerical ratings have been consolidated, where appropriate, into three groups:

| Rating on the scale of <br> "1" to "7" | Interpretive Level <br> $\mathbf{6 , 7}$ |
| :---: | :--- |
| $\mathbf{4 , 5}$ | These respondents express top-box positive responses. <br> positive response. |
| $\mathbf{1 , 2 , 3}$ | These respondents provide negative responses. |

## 3 CONSERVATION ORGANIZATIONS

### 3.1 AWARENESS OF ACTIVE CONSERVATION ORGANIZATIONS IN ALBERTA

### 3.1.1 UNAIDED AWARENESS

Respondents were asked to list as many active conservation organizations that operate in Alberta as they can recall, on a top-of-mind (unaided) basis.

One-quarter (25\%) recall Ducks Unlimited Canada. Eight percent (8\%) of respondents mention Greenpeace and six percent (6\%) mention the World Wildlife Fund. Other organizations are mentioned by 3\% or fewer respondents.

Two percent (2\%) of respondents recall Alberta Conservation Association on an unaided basis.

More than half (58\%) are unable to provide a response.

Table 1: Unaided Awareness of Active Conservation Organizations that Operate in Alberta (Q.1)
-Multiple Mentions-

| All respondents | $\begin{aligned} & \hline \text { May } 2008 \\ & (n=1,200) \end{aligned}$ | $\begin{gathered} \hline \text { Sept } 2009 \\ (n=900) \end{gathered}$ | $\begin{aligned} & \text { Oct } 2011 \\ & (n=1,202) \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Aware of Any | 50\% | 47\% | 42\% |
| Ducks Unlimited Canada (DUC) | 28\% | 27\% | 25\% |
| Greenpeace | 16\% | 9\% | 8\% |
| World Wildlife Fund (WWF) | 9\% | 10\% | 6\% |
| Alberta Fish and Game Association (AFGA) | 4\% | 4\% | 3\% |
| Alberta Conservation Association (ACA) | 2\% | 1\% | 2\% |
| Alberta Fish and Wildlife | - | 3\% | 1\% |
| Parks Canada | - | 1\% | 1\% |
| Canadian Wildlife / Conservation / Federation / Fund | 1\% | - | 1\% |
| Nature Conservancy of Canada (NCC) | 1\% | 1\% | 1\% |
| Trout Unlimited Canada (TUC) | 2\% | 1\% | 1\% |
| Sierra Club / Foundation | 5\% | 2\% | 1\% |
| Alberta Hunter Education Instructors Association (AHEIA) | - | * | 1\% |
| Pembina Institute | 2\% | - | 1\% |
| Pheasants Forever (PF) | - | * | 1\% |
| Wild Elk Federation (WEF) | - | 1\% | 1\% |
| Foundation for North American Wild Sheep (FNAWS) | - | - | 1\% |
| Wilmore Wilderness Society (WWS) | - | * | 1\% |
| Other | 16\% | 23\% | 8\% |
| None/Don't know | 50\% | 53\% | 58\% |

[^0]
## Changes Over Time

Although unaided awareness of the Alberta Conservation Association (ACA) has remained consistent over time, unaided awareness of active conservation organizations in Alberta has decreased over time (42\% Oct 2011, 47\% Sept 2009, 50\% May 2008).

## Sub-segment Analysis

Region
While unaided awareness of Ducks Unlimited Canada is the highest of all the active conservation organizations that operate in Alberta among all respondents, it is particularly high among respondents from the rural south of Alberta ( $35 \%$ vs. $27 \%$ in Edmonton, $21 \%$ in Calgary, and $23 \%$ in the rural north). Rural southern respondents also demonstrate a higher unaided awareness of Fish and Wildlife than other regions ( $8 \%$ vs. $0 \%$ in Edmonton, $1 \%$ in Calgary, and 2\% in the rural North). On the other hand, unaided awareness of Greenpeace is lowest among respondents from the rural south of Alberta when compared with other regions (2\% vs. 11\% in Edmonton, 7\% in Calgary, and 6\% in the rural north).

## Gender

A higher proportion of male (48\%) than female (35\%) respondents can name active conservation organizations that operate in Alberta. In particular, a higher proportion of males than females mention Ducks Unlimited Canada (DUC) on an unaided basis ( $29 \%$ males vs. $21 \%$ females).

## Age

While unaided awareness of Ducks Unlimited Canada is the highest of all the active conservation organizations that operate in Alberta among all respondents, it is particularly high among younger and middle-aged respondents (aged 26 to 64) when compared with older Albertans ( $29 \%$ 26-35 years, 28\% 36-50 years, $31 \% 51-64$ years vs. $14 \% 65+$ years). A lower proportion of those aged 65 years or older (31\%) can name any active conservation organizations operating in Alberta when unaided than 26 to 64 years olds ( $42 \%$ $26-35$ years, $45 \% 36-50$ years, $48 \% 51-64$ years).

### 3.1.2 AIDED AWARENESS

Respondents were then read a list of conservation organizations that are active in Alberta and asked if they are aware (aided) of each organization.

The great majority (88\%) indicate awareness of at least one of these organizations.

Awareness of Alberta Conservation Association increases from 2\% (Table 1) on an unaided basis, to the second most recognized conservation organization (45\%) when aided.

Aided awareness is highest for Alberta Fish and Game Association (80\%), slightly less than twice the proportion of awareness of the next highest organization (ACA at 45\%).

A range of $22 \%$ to $30 \%$ of respondents are aware, on an aided basis, of:
$\checkmark$ Trout Unlimited Canada (30\%);
$\checkmark$ Alberta Hunter Education Instructors Association (31\%);
$\checkmark$ Alberta Trappers Association (29\%);
$\checkmark$ Alberta Professional Outfitters Society (22\%).

Fewer respondents are aware of the Federation of Alberta Naturalists (14\%), the Foundation for North American Wild Sheep (8\%) and Pheasants Forever (8\%).

Twelve percent (12\%) of respondents are not aware of any of the organizations listed.

Table 2: Aided Awareness of Conservation Organizations (Q.2)
-Multiple Mentions-

| All respondents | $\begin{aligned} & \text { May } 2008 \\ & (n=1,200) \end{aligned}$ | $\begin{gathered} \text { Sept } 2009 \\ (n=900) \end{gathered}$ | $\begin{aligned} & \text { Oct } 2011 \\ & (n=1,202) \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Aware of Any | 92\% | - | 88\% |
| Alberta Fish and Game Association (AFGA) | 85\% | - | 80\% |
| Alberta Conservation Association (ACA) | 41\% | 25\% | 45\% |
| Trout Unlimited Canada (TUC) | 32\% | - | 30\% |
| Alberta Hunter Education Instructors Association (AHEIA) | 29\% | - | 31\% |
| Alberta Trappers Association (ATA) | 29\% | - | 29\% |
| Alberta Professional Outfitters Society (APOS) | 24\% | - | 22\% |
| Federation of Alberta Naturalists (FAN) | 17\% | - | 14\% |
| Foundation for North American Wild Sheep (FNAWS) | 8\% | - | 8\% |
| Pheasants Forever (PF) | 5\% | - | 8\% |
| Not Aware of Any | 9\% | - | 12\% |

## Changes Over Time

Aided awareness of active conservation organizations in Alberta has decreased since May 2008 (88\% in October 2011, 92\% in May 2008). While aided awareness of the Alberta Conservation Association has increased since September 2009, it remains consistent with the results of May 2008 (45\% in October 2011, $25 \%$ in September 2009, 41\% in May 2008).

## Sub-segment Analysis

## Region

Aided awareness of all active conservation organizations mentioned is higher among rural respondents compared to urban respondents with the exclusion of the Federation of Alberta Naturalists (FAN) and Trout Unlimited Canada (TUC). Notably, a higher proportion of rural (51\%) than urban (43\%) respondents are aware of the Alberta Conservation Association when aided.

Respondents in the rural south of Alberta had higher awareness of the Alberta Trappers Association (ATA) ( $48 \%$ ) and the Foundation for North American Wild Sheep (FNAWS) (18\%) when compared those in the rural north ( $25 \%$ ATA, $9 \%$ FNAWS).

Although aided awareness is highest for Alberta Fish and Game Association among all regions, it is lower for Calgarian respondents when compared to the other regions ( $71 \%$ vs. $83 \%$ in Edmonton, $88 \%$ in the rural north, $93 \%$ in the rural south).

There is higher awareness for Trout Unlimited Canada (TUC) in the southern regions of Alberta when compared with the northern ( $37 \%$ Calgary, $39 \%$ in the rural south vs. $22 \%$ Edmonton, $22 \%$ in the rural north).

## Age

When aided, a higher proportion of those respondents aged 36 years of age or older are aware of active conservation organizations that operate in Alberta than respondents aged 26 to 35 ( $89 \% 36-50$ years, $95 \%$ $51-64$ years, $93 \% 65$ years or older vs. $79 \% 26-35$ years).

When aided, older Albertans (aged 51 and older) have a higher awareness than younger Albertans of the following Alberta conservation organizations:

- Alberta Fish and Game Association (AFGA) (90\% 51-64 years, $92 \% 65+$ years vs. 68\% 18-25 years, $70 \%$ 26-35 years, $81 \% 36-50$ years),
- Alberta Professional Outfitters Society (APOS) (35\% 51-64 years, $34 \% 65+$ years vs. $11 \% 18-25$ years, $11 \% 26-35$ years, $20 \% 36-50$ years), and
- the Federation of Alberta Naturalists (FAN) (21\% 51-64 years, $22 \% 65+$ years vs. 7\% 18-25 years, $6 \%$ $26-35$ years, $13 \% 36-50$ years).

Aided awareness of Trout Unlimited Canada (TUC) is higher among Albertans aged 51 to 64 ( $40 \%$ ) and lower among Albertans aged 18 to 25 (17\%).

### 3.2 PERCEPTIONS OF ACTIVE CONSERVATION ORGANIZATIONS IN ALBERTA

Respondents who are aware of the various conservation organizations active in Alberta were asked to rate how well each conservation association performs in their conservation work on a scale of one to seven, with one meaning very poor, four meaning good, and seven meaning excellent.

Ducks Unlimited Canada garners the highest performance ratings, with the great majority (82\%) of those who have heard of them providing good $(4,5,6,7)$ ratings, including more than half $(52 \%)$ who provide very good $(6,7)$ ratings.

Two thirds (67\%) of respondents aware of the Alberta Hunter Education Instructors Association believe it is doing well (4,5,6,7 ratings) in terms of its conservation work, with almost four-in-ten (37\%) providing top-box $(6,7)$ ratings. Two-thirds $(67 \%)$ of those aware believe that the World Wildlife Federation is doing well (4,5,6,7 ratings) in terms of its conservation work, with equal proportions providing moderate $(4,5)$ and topbox $(6,7)$ ratings.

Half to two-thirds (a range of $49 \%$ to $65 \%$ ) of respondents aware of the following organizations provide good $(4,5,6,7)$ ratings, with responses tending towards more moderate $(4,5)$ than top-box $(6,7)$ ratings, on the conservation work of:
$\checkmark \quad$ Pheasants Forever (65\%);
$\checkmark$ Foundation for North American Wild Sheep (64\%);
$\checkmark$ Alberta Fish and Game Association (62\%);
$\checkmark$ Alberta Conservation Association (61\%);
$\checkmark$ Trout Unlimited Canada (57\%); and
$\checkmark$ Federation of Alberta Naturalists (49\%).

Forty-three percent (43\%) provide good $(4,5,6,7)$ ratings for Alberta Trappers Association, with fifteen percent $(15 \%)$ providing very good $(6,7)$ ratings. Forty-two percent $(42 \%)$ provide good $(4,5,6,7)$ ratings for Alberta Professional Outfitters Society, with one-in-ten providing very good $(6,7)$ ratings $(11 \%)$.

Fig. 1: Perceptions of Quality of Conservation Work among Conservation Organizations Active in Alberta (Q.3) Cont'd
(Scale: 1=Poor, 4=Good, 7=Excellent)

## Changes Over Time

A higher proportion of Albertans aware of the Alberta Conservation Association provided good $(4,5,6,7)$ and very good $(6,7)$ ratings of the organization in October 2011 ( $61 \%$ good, $20 \%$ very good) when compared with May 2008 (53\% good, $15 \%$ very good).

## Sub-segment Analysis

## Region

Rural respondents tend to provide higher proportions of good $(4,5,6,7)$ and/or very good $(6,7)$ ratings in terms of conservation work done by active conservation organizations in Alberta, when compared with urban respondents. Specifically, ratings are higher in rural areas for:

- Alberta Conservation Association (rural: 27\% very good vs. urban: $17 \%$ very good),
- Alberta Fish and Game Association (rural: $68 \%$ good, $36 \%$ very good vs. urban: $60 \%$ good, $22 \%$ very good),
- Alberta Trappers Association (rural: $56 \%$ good, $23 \%$ very good vs. urban: $37 \%$ good, $12 \%$ very good), and
- Trout Unlimited Canada (rural: $68 \%$ good vs. urban: $53 \%$ good).

A higher proportion of respondents in the rural south of Alberta aware of Pheasants Forever provide very good $(6,7)$ ratings in terms of the conservation work done by the organization when compared with respondents from Calgary and the rural north of Alberta ( $61 \%$ in the rural south vs. $16 \%$ in Calgary, $10 \%$ in the rural north).

A higher proportion of Edmontonians than Calgarians who are aware of Ducks Unlimited Canada Forever provide good $(4,5,6,7)$ and very good $(6,7)$ ratings in terms of the conservation work done by the organization (Edmonton: 90\% good, 60\% very good vs. Calgary: 70\% good, 39\% very good).

## Gender

Male respondents tend to provide higher proportions of good $(4,5,6,7)$ and/or very good $(6,7)$ ratings in terms of conservation work done by active conservation organizations in Alberta, when compared with female respondents. Specifically, ratings are higher for:

- Alberta Fish and Game Association (males: 70\% good vs. females: $53 \%$ good),
- Alberta Trappers Association (males: 51\% good, 19\% very good vs. females: 32\% good, 9\% very good), and
- Ducks Unlimited Canada (males: $88 \%$ good, $59 \%$ very good vs. females: $72 \%$ good, $41 \%$ very good).

On the other hand, a lower proportion of male than female respondents aware of the World Wildlife Fund provide very good $(6,7)$ ratings in terms of the conservation work done by the organization ( $14 \%$ males vs. 64\% females).

Age

## ACA

Among respondents aware of the Alberta Conservation Association, a higher proportion of respondents aged 36 to 64 years ( $66 \%$ ) gave the organization good ratings in terms of its conservation work $(4,5,6,7)$ when compared with those respondents aged 65 years or older (51\%).

## AFGA

Among respondents aware of the Alberta Fish and Game Association, a higher proportion of respondents aged 51 years of older believe it is doing very well ( 6,7 ratings) in terms of its conservation work when compared with younger Albertans (aged 26-35) ( $29 \%$ 51-64 years, $36 \% 65+$ years vs. $24 \% 26-35$ years).

## FNAWS

Among respondents aware of the Foundation for North American Wild Sheep, a higher proportion of respondents aged $36-50$ believe it is doing very well ( 6,7 ratings) in terms of its conservation work when compared with Albertans aged 26 to 35 and 65 years or older ( $47 \% 36-50$ years vs. $6 \% 26-35$ years, $15 \% 65+$ years).

## TUC

Among respondents aware of Trout Unlimited Canada, a higher proportion of younger respondents (aged 1825) believe it is doing well ( $4,5,6,7$ ratings) in terms of its conservation work when compared with middleaged and older Albertans (aged 26 or older) ( $87 \% 18-25$ years vs. $46 \% 26-35$ years, $61 \% 36-50$ years, $55 \% 51-$ 64 years, $52 \%$ 65+ years).

## 4 PERCEPTION OF BIGGEST CONSERVATION ISSUES

### 4.1 PERCEPTION OF BIGGEST CURRENT WILDLIFE CONSERVATION ISSUE

Respondents were given a choice of four wildlife conservation issues and asked to pick the one which they believe is the biggest issue in Alberta at this time. The biggest issue chosen by Albertans by a considerable margin is loss of native wildlife habitat ( $60 \%$ ), followed by wildlife diseases ( $11 \%$ ), over hunting ( $11 \%$ ) and lack of wildlife research ( $9 \%$ ). Nine percent ( $9 \%$ ) of respondents are not aware of any current wildlife conservation issues in Alberta.

Table 3: Perception of Biggest Issue Currently Affecting Wildlife Conservation in Alberta (Q.5)

| All respondents | May 2008 <br> $(\mathrm{n}=1,200)$ | Oct 2011 <br> $(\mathrm{n}=1,202)$ |
| :--- | :---: | :---: |
| Loss of native wildlife habitat | $59 \%$ | $60 \%$ |
| Wildlife diseases | $16 \%$ | $11 \%$ |
| Over hunting | $11 \%$ | $11 \%$ |
| Lack of wildlife research | $8 \%$ | $9 \%$ |
| Don't know | $7 \%$ | $9 \%$ |

## Changes Over Time

Fewer respondents think that wildlife diseases are the biggest issue currently affecting wildlife conservation in Alberta when compared with May 2008 (11\% October 2011 vs. 16\% May 2008).

## Sub-segment Analysis

Region
While loss of native wildlife habitat is considered the biggest issue with respect to wildlife conservation in Alberta to the majority Albertans, a higher proportion of urban respondents think this when compared with rural respondents ( $62 \%$ urban vs. $53 \%$ rural). On the other hand, a higher proportion of rural respondents feel that wildlife diseases are the biggest issue when compared with urban respondents ( $16 \%$ rural vs. $10 \%$ urban).

A higher proportion of respondents in the rural north of Alberta and Calgary believe that over hunting is the biggest issue with respect to wildlife conservation in Alberta when compared with respondents in the rural south of Alberta (16\% in rural north, 12\% in Calgary vs. $5 \%$ in rural south).

Gender

A higher proportion of males than females believe that wildlife diseases are the biggest issue with respect to wildlife conservation in Alberta ( $15 \%$ males vs. $8 \%$ females).

## Age

While loss of native wildlife habitat is considered the biggest issue with respect to wildlife conservation in Alberta to the majority Albertans, a lower proportion of older respondents (aged 65 or older) think this when compared younger and middle-aged respondents ( $44 \%$ 65+ years vs. 64\% 18-25 years, 64\% 26-35 years, 61\% 36-50 years, 63\% 51-64 years).

### 4.2 PERCEPTION OF BIGGEST CURRENT FISH CONSERVATION ISSUE

Albertans were given a choice of four fish conservation issues and asked to pick one which they believed is the biggest issue in Alberta at this time. Over half ( $56 \%$ ) of Albertans believe pollution of lakes and rivers is currently the biggest issue affecting fish conservation in Alberta, followed by reduced stream flows due to over allocation of water ( $18 \%$ ), overfishing ( $10 \%$ ) and lack of fisheries research ( $7 \%$ ). Nine percent ( $9 \%$ ) of respondents are not aware of any current fish conservation issues in Alberta.

Table 5: Perception of Biggest Issue Currently Affecting Fish Conservation in Alberta (Q.6)

| All respondents | May 2008 <br> $(\mathrm{n}=1,200)$ | Oct 2011 <br> $(\mathrm{n}=1,202)$ |
| :--- | :---: | :---: |
| Pollution of lakes and rivers | $65 \%$ | $56 \%$ |
| Reduced stream flows due to over <br> allocation of water | $17 \%$ | $18 \%$ |
| Over fishing | $8 \%$ | $10 \%$ |
| Lack of fisheries research | $6 \%$ | $7 \%$ |
| Don't know | $5 \%$ | $9 \%$ |

## Changes Over Time

A lower proportion of respondents think that the pollution of lakes and rivers is currently the biggest issue affecting fish conservation in Alberta than in May 2008 ( $56 \%$ in October 2011 vs. 65\% in May 2008).

## Sub-segment Analysis

## Region

A higher proportion of Edmontonians think that reduced stream flows due to over allocation of water is the biggest issue with respect to fish conservation in Alberta when compared with respondents in the rural north (21\% Edmonton vs. 12\% in rural north).

A higher proportion of respondents in Calgary and the rural north think that lack of fisheries research is the biggest issue with respect to fish conservation in Alberta when compared to respondents from Edmonton (10\% Calgary, 11\% in rural north vs. 3\% Edmonton).

## Gender

While pollution of lakes and rivers is considered the biggest issue with respect to fish conservation in Alberta to the majority Albertans, a higher proportion of females think this when compared with male respondents ( $63 \%$ females vs. $50 \%$ males).

On the other hand, a higher proportion of males think that reduced stream flows due to over allocation of water is the biggest issue with respect to fish conservation in Alberta when compared with female respondents ( $23 \%$ males vs. $13 \%$ females). Similarly, a higher proportion of male than female respondents think that lack of fisheries research is the biggest issue with respect to fish conservation in Alberta ( $10 \%$ males vs. 5\% females).

Age
A higher proportion of middle-aged Albertans (aged 36-64) think that reduced stream flows due to over allocation of water is the biggest issue with respect to fish conservation in Alberta when compared with other age groups ( $21 \% 36-50$ years, $24 \% 51-64$ years vs. $9 \% 18-25$ years, $14 \% 65+$ years).

## 5 OUTDOOR ACTIVITIES IN ALBERTA

### 5.1 SUPPORT FOR OUTDOOR ACTIVITIES IN ALBERTA

Respondents were given a list of possible outdoor activities and asked to rate their level of support for each of those activities.

Eight-in-ten or more Albertans support (4,5,6,7 ratings), with approximately half or more strongly supporting ( 6,7 ratings), the following outdoor activities:
$\checkmark$ Hiking ( $93 \%$ support, including $76 \%$ strongly support),
$\checkmark$ Nature photography ( $89 \%$ support, including $73 \%$ strongly support),
$\checkmark$ Canoeing ( $88 \%$ support, including 67\% strongly support),
$\checkmark$ Bird watching ( $86 \%$ support, including $65 \%$ strongly support),
$\checkmark$ Horseback riding ( $85 \%$ support, including $58 \%$ strongly support),
$\checkmark$ Berry picking (85\% support, including $57 \%$ strongly support),
$\checkmark$ Dog walking (85\% support, including $64 \%$ strongly support), and
$\checkmark$ Catch \& release fishing (82\% support, including $55 \%$ strongly support).

Three-in-ten or fewer Albertans strongly support (6,7 ratings) the following outdoor activities:
$\checkmark$ Catch \& keep fishing (70\% support, including 29\% strongly support),
$\checkmark$ Plant collection ( $66 \%$ support, including $29 \%$ strongly support),
$\checkmark$ Motorized watercraft use ( $65 \%$ support, including $27 \%$ strongly support),
$\checkmark$ Game bird hunting ( $52 \%$ support, including $24 \%$ strongly support),
$\checkmark$ Big game hunting ( $50 \%$ support, including $25 \%$ strongly support),
$\checkmark$ Off-highway vehicle use ( $49 \%$ support, including $19 \%$ strongly support), and
$\checkmark$ Trapping (42\% support, including $16 \%$ strongly support).

*Wording change from 2008 survey in which it was "Botanical" collection

## Changes Over Time

Catch and release fishing, catch and keep fishing, game bird hunting, and big game hunting are the only activities for which support was measured in 2009.

## Catch and release fishing

An increased proportion of respondents supported (4,5,6,7 ratings) catch and release fishing in September 2009 (86\%) when compared with May 2008 (82\%). However, in October 2011 support for this activity has fallen back to what it was in May 2008 (82\%).

## Catch and keep fishing

An increased proportion of respondents supported (4,5,6,7 ratings) catch and keep fishing in September 2009 ( $72 \%$ ) when compared with May 2008 ( $66 \%$ ). In October 2011, support for this activity remains high ( $70 \%$ ), while strong support ( 6,7 ratings) has risen since September 2009 ( $29 \%$ strongly support in October 2011 vs. $22 \%$ strongly support in September 2009).

## Game bird hunting

An increased proportion of respondents supported (4,5,6,7 ratings) game bird hunting in September 2009 (60\%) when compared with May 2008 (50\%). While support for this activity in 2011 ( $52 \%$ ) has fallen back to almost what it was in May 2008 (50\%), strong support has risen ( $24 \%$ strongly support in October 2011 vs. $18 \%$ strongly support in May 2008 and $20 \%$ strongly support in September 2009).

## Big gaming hunting

An increased proportion of respondents supported (4,5,6,7 ratings) big game hunting in September 2009 (57\%) when compared with May 2008 (47\%). While support for this activity in 2011 (50\%) has fallen back to almost what it was in May 2008 (47\%), strong support has risen ( $25 \%$ strongly support in October 2011 vs. $18 \%$ strongly support in May 2008 and $21 \%$ strongly support in September 2009).

A higher proportion of respondents both support (4,5,6,7 ratings) and strongly support (5,6 ratings) the following activities than did in May 2008:
$\checkmark$ Dog walking (85\% support, including 64\% strongly support in October 2011 vs. 81\% support, including $49 \%$ strongly support in May 2008),
$\checkmark$ Plant collection (66\% support, including 29\% strongly support in October 2011 vs. 61\% support, including $25 \%$ strongly support in May 2008),
$\checkmark$ Motorized watercraft use (65\% support, including 27\% strongly support in October 2011 vs. 56\% support including $16 \%$ strongly support in May 2008), and
$\checkmark$ Off-highway vehicle use (49\% support, including $19 \%$ strongly support in October 2011 vs. $40 \%$ support, including $13 \%$ strongly support in May 2008).

Although support (4,5,6,7 ratings) for the following activities did not increase among respondents since May 2008, strong support ( 6,7 ratings) did increase for:
$\checkmark$ Hiking ( $76 \%$ strongly support in October 2011, vs. $72 \%$ strongly support in May 2008),
$\checkmark$ Horseback riding ( $58 \%$ strongly support in October 2011 vs. $48 \%$ strongly support in May 2008) , and
$\checkmark$ Berry picking (57\% strongly support in October 2011 vs. 50\% strongly support in May 2008).

Support ( $4,5,6,7$ ratings) and strong support ( 6,7 ratings) among respondents for the following activities is consistent with May 2008 results:
$\checkmark$ Nature photography,
$\checkmark$ Canoeing, and
$\checkmark$ Trapping.

Although support (4,5,6,7 ratings) for bird watching remains consistent among respondents since May 2008, strong support ( 6,7 ratings) has decreased ( $65 \%$ strongly support in October 2011 vs. $72 \%$ strongly support in May 2008).

## Sub-segment Analysis

Region
Rural respondents tend to have more support ( $4,5,6,7$ ratings) and/or strong support good $(6,7$ ) for activities that have to do with hunting or fishing related activities than do urban respondents. Specifically ratings are higher for:

- Catch and keep fishing (rural: $79 \%$ supportive, $42 \%$ very supportive vs. urban: $67 \%$ supportive, $25 \%$ very supportive),
- Trapping (rural: $57 \%$ supportive, $25 \%$ very supportive vs. urban: $37 \%$ supportive, $13 \%$ very supportive),
- Motorized watercraft use (rural: $71 \%$ supportive, $34 \%$ very supportive vs. urban: $63 \%$ supportive, $25 \%$ very supportive),
- Game bird hunting (rural: $67 \%$ supportive, $34 \%$ very supportive vs. urban: $47 \%$ supportive, $20 \%$ very supportive),
- Big game hunting (rural: 73\% supportive, $42 \%$ very supportive vs. urban: $43 \%$ supportive, $19 \%$ very supportive), and
- Off-highway vehicle use (rural: 61\% supportive, $30 \%$ very supportive vs. urban: $45 \%$ supportive, $15 \%$ very supportive).

On the other hand rural respondents tend to have less support (4,5,6,7 ratings) and/or strong support good $(6,7)$ for other activities not related to hunting or fishing than do urban respondents. Specifically ratings are lower for:

- Hiking (rural: 70\% very supportive vs. urban: $78 \%$ very supportive),
- Bird watching (rural: $60 \%$ very supportive vs. urban: $67 \%$ very supportive),
- Canoeing (rural: $61 \%$ very supportive vs. urban: $70 \%$ very supportive), and
- Dog walking (rural: $80 \%$ supportive, $57 \%$ very supportive vs. urban: $86 \%$ supportive, $66 \%$ very supportive).

A higher proportion of northern Albertans (Edmontonians and Albertans in the rural north) are supportive ( $4,5,6,7$ ratings) of plant collection in Alberta than southern Albertans (Calgarians and Albertans in the rural south) ( $72 \%$ Edmonton, $72 \%$ in rural north vs. $58 \%$ Calgary, $65 \%$ in rural south). There is the least strong support ( 6,7 ratings) for plant collection in Alberta among Calgarians when compared with other regions (19\% Calgary vs. 38\% Edmonton, 33\% in rural north, 31\% in rural south).

## Gender

Male respondents tend to have more support (4,5,6,7 ratings) and/or strong support $(6,7)$ for activities that have to do with hunting/fishing related activities than do females. Specifically, ratings are higher for:

- Catch and release fishing (males: 59\% very supportive vs. females: 50\% very supportive),
- Trapping (males: 50\% supportive, $23 \%$ very supportive vs. females: $34 \%$ supportive, $9 \%$ very supportive),
- Motorized watercraft use (males: $30 \%$ very supportive vs. females: $\mathbf{2 4 \%}$ very supportive),
- Game bird hunting (males: 59\% supportive, 31\% very supportive vs. females: $44 \%$ supportive, $16 \%$ very supportive),
- Big game hunting (males: 56\% supportive, 31\% very supportive vs. females: 45\% supportive, $18 \%$ very supportive), and
- Off-highway vehicle use (males: $22 \%$ very supportive vs. females: $16 \%$ very supportive).

On the other hand, male respondents tend to have less support (4,5,6,7 ratings) and/or strong support good $(6,7)$ for other activities not related to hunting or fishing than do females. Specifically, ratings are lower for:

- Bird watching (males: $82 \%$ supportive, $60 \%$ very supportive vs. females: $91 \%$ supportive, $71 \%$ very supportive),
- Nature photography (males: $86 \%$ supportive, $69 \%$ very supportive vs. females: $97 \%$ supportive, $76 \%$ very supportive),
- Horseback riding (males: $82 \%$ supportive, $52 \%$ very supportive vs. females: $88 \%$ supportive, $64 \%$ very supportive),
- Dog walking (males: 56\% very supportive vs. females: 72\% very supportive), and
- Berry picking (males: $81 \%$ supportive vs. females: $88 \%$ supportive).

Age

## Catch and release fishing

A higher proportion of middle-aged respondents (36-64 years) are supportive (4,5,6,7 ratings) of catch and release fishing in Alberta when compared with younger respondents (26-35 years) (89\% 36-50 years, 84\% 5164 years vs. $74 \%$ 26-35 years).

## Hiking

A lower proportion of older Albertans (aged 65 or older) are very supportive (6,7 ratings) of hiking in Alberta when compared with Albertans of younger age groups (65\% 65+ years vs. 82\% 18-25 years, 76\% 26-35 years, 77\% 36-50 years, 77\% 51-64 years).

## Canoeing

A lower proportion of older Albertans (aged 65 or older) are supportive (4,5,6,7 ratings) and very supportive ( 6,7 ratings) of canoeing in Alberta when compared with Albertans of younger age groups (65+ years: 74\% supportive, $46 \%$ very supportive vs. $18-25$ years: $96 \%$ supportive, $75 \%$ very supportive, $26-35$ years: $88 \%$ supportive, $72 \%$ very supportive, $36-50$ years: $92 \%$ supportive, $73 \%$ very supportive, $51-64$ years: $87 \%$ supportive, $65 \%$ very supportive).

## Nature Photography

A higher proportion of younger Albertans (aged 18-25) are supportive (4,5,6,7 ratings) of nature photography in Alberta when compared with Albertans of older age groups ( $97 \%$ 18-25 years vs. 84\% 26-35 years, 89\% 3650 years, $90 \%$ 51-64 years, $85 \% 65+$ years).

## Motorized watercraft use

A higher proportion of younger and middle-aged Albertans (aged 18-50) are supportive (4,5,6,7 ratings) and very supportive ( 6,7 ratings) of motorized watercraft use in Alberta when compared with older Albertans (51 years or older) (18-25 years: 79\% supportive, $39 \%$ very supportive, $26-35$ years: $66 \%$ supportive, $32 \%$ very supportive, $36-50$ years: $68 \%$ supportive, $29 \%$ very supportive vs. $51-64$ years: $58 \%$ supportive, $29 \%$ very supportive, 65+ years: 51\% supportive, 19\% very supportive).

## Horseback riding

A higher proportion of middle-aged Albertans (aged 26-50) are supportive (4,5,6,7 ratings) of horseback riding in Alberta when compared with older Albertans (65 years or older) (86\% 26-35 years, 87\% 36-50 years vs. 78\% 65+ years).

## Dog walking

A higher proportion of younger and middle-aged Albertans (aged 18-25 and 36-64) are supportive (4,5,6,7 ratings) of dog walking in Alberta when compared with older Albertans ( 65 years or older) (91\% 18-25 years, $87 \%$ 36-50 years, $84 \%$ 51-64 years vs. 76\% 65+ years). Specifically, a higher proportion of younger Albertans (aged 18-25) are very supportive (6,7 ratings) of dog walking in Alberta when compared with Albertans of older age groups ( $80 \% 18-25$ years vs. 61\% 26-35 years, 64\% 36-50 years, 61\% 51-64 years, 52\% 65+ years).

## Off-highway vehicle use

A higher proportion of younger and middle-aged Albertans (aged 18-50) are supportive ( $4,5,6,7$ ratings) of off-highway vehicle use in Alberta when compared with older Albertans ( 51 years or older) ( $59 \% 18$ - 25 years, $57 \% 26-35$ years, $52 \% 36-50$ years vs. $40 \% 51-64$ years, $30 \% 65+$ years).

## Plant collection

A higher proportion of younger and middle-aged Albertans (aged 18-25 and 36-50) are supportive (4,5,6,7 ratings) of plant collection in Alberta when compared with older Albertans ( 51 years or older) ( $79 \%$ 18-25 years, 69\% 36-50 years vs. 58\% 51-64 years, 59\% 65+ years).

### 5.2 PARTICIPATION IN OUTDOOR ACTIVITIES

Respondents were given a list of potential outdoor activities in Alberta and asked to indicate whether in the past 12 months they have participated in any of those activities. Almost three-quarters (72\%) of respondents indicate participating in hiking in the past 12 months, followed by nature photography (52\%), bird watching (47\%), berry picking (45\%), fishing (33\%), canoeing (25\%), plant collection (14\%), hunting (13\%), and trapping (1\%).

Table 7: Incidence of Participation in Various Outdoor Activities (Q.7)
-Multiple Mentions-

| All respondents | May 2008 <br> $(\mathrm{n}=1,200)$ | Oct 2011 <br> $(\mathrm{n}=1,202)$ |
| :--- | :---: | :---: |
| Hiking | $65 \%$ | $72 \%$ |
| Nature photography | $42 \%$ | $52 \%$ |
| Bird watching | $39 \%$ | $47 \%$ |
| Berry picking | $22 \%$ | $45 \%$ |
| Fishing | $19 \%$ | $25 \%$ |
| Canoeing | $5 \%$ | $14 \%$ |
| Plant* collection | $9 \%$ | $13 \%$ |
| Hunting | $2 \%$ | $1 \%$ |
| Trapping |  |  |

*Wording change from 2008 survey in which it was "Botanical" collection

## Changes Over Time

Self-reported participation in all of the various outdoor activities mentioned has increased since May 2008.

## Sub-segment Analysis

Region
Rural respondents tend to have participated in more outdoor activities in the past 12 months than have urban respondents. Specifically, participation is higher for:

- Hunting ( $23 \%$ rural vs. $10 \%$ urban),
- Fishing ( $45 \%$ rural vs. $29 \%$ urban),
- Bird watching ( $58 \%$ rural vs. $43 \%$ urban),
- Trapping ( $3 \%$ rural vs. less than $1 \%$ urban), and
- Berry picking ( $60 \%$ rural vs. $41 \%$ urban).

Generally, respondents in the rural north have participated in more outdoor activities in the past 12 months than those in the rural south. Specifically, participation is higher for:

- Hunting ( $32 \%$ in rural north vs. $13 \%$ in rural south),
- Trapping ( $6 \%$ in rural north vs. less than $1 \%$ in rural south), and
- Berry picking ( $65 \%$ in rural north vs. $53 \%$ in rural south).

## Gender

Male respondents tend to have participated in more outdoor activities in the past 12 months than have female respondents. Specifically, participation is higher for:

- Hunting ( $21 \%$ males vs. $6 \%$ females),
- Fishing ( $43 \%$ males vs. $22 \%$ females),
- Hiking ( $77 \%$ males vs. $67 \%$ females), and
- Canoeing ( $30 \%$ males vs. $21 \%$ females).

Age

## Hunting

A higher proportion of middle aged respondents ( $26-50$ years) have gone hunting in Alberta in the past 12 months than older Albertans (aged 65 or older) ( $14 \% 26-35$ years, $15 \% 36-50$ years vs. $7 \% 65+$ years).

## Fishing

A lower proportion of older Albertans ( 65 years or older) have gone fishing in Alberta in the past 12 months than Albertans in younger age groups ( $19 \% 65+$ years vs. $47 \% 18-25$ years, $36 \% 26-35$ years, $33 \% 36-50$ years, 28\% 51-64 years).

## Hiking

A lower proportion of older Albertans (65 years or older) have gone hiking in Alberta in the past 12 months than Albertans in younger age groups (43\% 65+ years vs. 78\% 18-25 years, 78\% 26-35 years, 79\% 36-50 years, 71\% 51-64 years).

## Bird Watching

A higher proportion of older Albertans (51 years or older) have gone bird watching in Alberta in the past 12 months than Albertans in younger age groups (59\% 51-64 years, 53\% 65+ years vs. $34 \% 18-25$ years, $38 \%$ 2635 years, 47\% 36-50 years).

## Canoeing

A lower proportion of older Albertans (65 years or older) have gone canoeing in Alberta in the past 12 months than Albertans in younger age groups (7\% 65+ years vs. 46\% 18-25 years, 23\% 26-35 years, 30\% 3650 years, 20\% 51-64 years).

## Nature Photography

A lower proportion of older Albertans ( 65 years or older) have participated in nature photography in Alberta in the past 12 months than Albertans in younger age groups ( $37 \% 65+$ years vs. 55\% 26-35 years, 58\% 36-50 years, 56\% 51-64 years).

## Berry picking

A higher proportion of middle-aged respondents (aged 36-64) have gone berry picking in the past 12 months than have Albertans in other age groups (49\% 36-50 years, 50\% 51-64 years vs. 38\% 26-35 years, 39\% 65+ years).

### 5.3 PARTICIPATION IN HUNTING / FISHING

### 5.3.1 HUNTING PARTICIPATION

Respondents who mention not having participated in hunting in the past 12 months ( $\mathrm{n}=1,057$ ) were asked whether they have ever participated in hunting in the past. Two-in-ten respondents (22\%) not participating in hunting in the past 12 month indicate they have participated in the past.

Table 8: Incidence of Participating in Hunting in the Past (Q.8a)

| Respondents who have not hunted <br> in the past 12 months in Alberta | May 2008 <br> $(n=1,069)$ | Oct 2011 <br> $(n=1,057)$ |
| :--- | :---: | :---: |
| Yes | $22 \%$ | $22 \%$ |
| No | $78 \%$ | $78 \%$ |

Respondents who mention having participated in hunting in the past, but not as recent as in the past 12 months, were asked to give reasons for not having participated in hunting recently. Respondents most frequently mention loss or change of interest (34\%) as the number one reason for not participating in hunting in the past 12 months, followed by lack of time (21\%), that they do not believe in or like or support hunting (14\%), age (12\%), regulations (6\%), they no longer own guns or don't have or like guns (6\%), health (4\%), no or expired license or struggle to get license (4\%), and issues with accessibility to the location (4\%).

All other reasons are mentioned by three percent (3\%) or fewer respondents.

Table 9: Reasons for Not Having Participated in Hunting in Past 12 months (Q.8b)
-Multiple Mentions-

| Respondents who have hunted in the past but have not hunted in the past 12 months in Alberta | May 2008 $(n=277)$ | $\begin{aligned} & \text { Oct } 2011 \\ & (n=255) \end{aligned}$ |
| :---: | :---: | :---: |
| Lost interest / Change in interests / habits / lifestyle | 29\% | 34\% |
| Lack of time | 18\% | 21\% |
| Do not believe in / don't like / don't support hunting | 6\% | 14\% |
| Age (e.g. too old) | 9\% | 12\% |
| Regulations | 4\% | 6\% |
| No longer own guns / Don't have / like guns | 3\% | 6\% |
| Health | 4\% | 4\% |
| No license / Expired license / Struggle to get license | 3\% | 4\% |
| Accessibility to the location | 2\% | 4\% |
| Don't know where to go | 3\% | 3\% |
| Don't eat hunted meat / No use for hunted meat | 2\% | 3\% |
| Reduce opportunity to harvest | - | 2\% |
| Quit / Retired / Just don't do it anymore | 5\% | 1\% |
| Cost | 3\% | 1\% |
| Unsafe / Dangerous | 2\% | 1\% |
| Lack of training / Hard to get training | 1\% | 1\% |
| Rather watch the animals than kill them | 1\% | 1\% |
| Conservation concerns | - | 1\% |
| Don't like seeing animals killed / killing animals | 3\% | - |
| Other | 17\% | - |
| Don't know | 5\% | 2\% |

## Changes Over Time

Among Albertans, the incidence of participating in hunting in the past has not changed since May 2008. Reasons for not hunting in the last 12 months have not changed significantly since May 2008 among respondents who have hunted but not in the past 12 months.

## Sub-segment Analysis

Region
Among respondents who have not hunted in the past 12 months, a higher proportion of rural than urban respondents have hunted in the past (33\% rural vs. 19\% urban).

Among respondents who have hunted but not in the past 12 months, a higher proportion of urban than rural respondents indicate that they have not hunted in the past 12 months because they have lost interest or their interest/lifestyle has changed ( $42 \%$ urban vs. 19\% rural). A higher proportion of urban than rural respondents also indicate that they have not hunted in the past 12 months because they do not believe in or support hunting (17\% urban vs. $7 \%$ rural).

Gender

Among respondents who have not hunted in the past 12 months, a higher proportion of males than females have hunted in the past (37\% males vs. 10\% females).

Among respondents who have hunted but not in the past 12 months, a higher proportion of males than females indicate that they have not hunted in the past 12 months due of lack of time ( $24 \%$ males vs. $11 \%$ females). On the other hand, a higher proportion of female than male respondents indicate that they have not hunted in the past 12 months because of age restrictions (e.g., too old) ( $8 \%$ male vs. $24 \%$ female), no license or difficulty obtaining a license ( $1 \%$ males vs. $12 \%$ females), or they don't eat hunted meat (1\% males vs. $11 \%$ females).

Age
Among respondents who have not hunted in the past 12 months, a higher proportion of older respondents ( 51 years or older) have hunted in the past when compared with respondents in younger age groups ( $28 \% 51-$ 64 years, $33 \% 65+$ years vs. 11\% 18-25 years, 20\% 26-35 years, 20\% 36-50 years).

Among respondents who have hunted but not in the past 12 months, a lower proportion of older respondents ( 65 years or older) than those in younger age groups indicate that they have not hunted in the last 12 months due to lack of time ( $3 \% 65+$ years vs. $54 \% 18-25,34 \% 26-35$ years, $20 \% 36-50$ years, 19\% 5164 years). On the other hand, a higher proportion of respondents aged 65 and older indicate that they have not hunted in the past 12 months due to age restrictions (e.g., too old) when compared to younger age groups ( $43 \% 65+$ years vs. $0 \% 18-25$ years, $1 \% 26-35$ years, $3 \% 36-50$ years, $7 \% 51-64$ years).

### 5.3.2 FISHING PARTICIPATION

Respondents who mention not having participated in fishing in the past 12 months ( $\mathrm{n}=849$ ) were asked whether they have ever participated in fishing in the past. Six in ten respondents (64\%) who did not participate in fishing in the past 12 months indicate participating in the past.

Table 10: Incidence of Participating in Fishing in the Past (Q.9a)

| Respondents who have not fished <br> in the past 12 months in <br> Iakes/streams in Alberta | May 2008 <br> $(\mathrm{n}=876)$ | Oct 2011 <br> (n=849) |
| :--- | :---: | :---: |
| Yes | $63 \%$ | $64 \%$ |
| No | $37 \%$ | $36 \%$ |

Respondents who mention having participated in fishing but not in the past 12 months were asked to give reasons for not having participated in fishing recently. Respondents most frequently mention lack of time $(35 \%)$ as the number one reason for not participating in fishing in the past 12 months, followed by loss of interest (27\%), age (7\%), no equipment/boat (5\%), issues with location or accessibility (5\%), health (4\%) and regulations (4\%).

All other reasons are mentioned by three percent (3\%) or fewer respondents.

Table 11: Reasons for Not Having Participated in Fishing in Past 12 months (Q.9b)
-Multiple Mentions-

| Respondents who have fished in the past but have not fished in the past 12 months in Alberta | $\begin{gathered} \text { May } 2008 \\ (n=577) \end{gathered}$ | $\begin{aligned} & \text { Oct } 2011 \\ & (n=537) \end{aligned}$ |
| :---: | :---: | :---: |
| Lack of time / Too busy | 33\% | 35\% |

## Changes Over Time

Among Albertans, the incidence of participating in fishing in the past has not changed since May 2008. Reasons for not fishing in the last 12 months have not changed significantly since May 2008 among respondents who have fished but not in the past 12 months.

## Sub-segment Analysis

## Region

Among respondents who have not fished in the past 12 months, a higher proportion of respondents from the rural north of Alberta have fished in the past when compared with Calgarian respondents ( $72 \%$ in rural north vs. $60 \%$ Calgary).

Among respondents who have fished but not in the past 12 months, a higher proportion of rural than urban respondents indicate that they have not fished in the last 12 months due to lack of time or because they are too busy ( $46 \%$ rural vs. $32 \%$ urban). On the other hand, a lower proportion of rural than urban respondents indicate it is due to loss of interest ( $19 \%$ rural vs. $29 \%$ urban).

## Gender

Among respondents who have not fished in the past 12 months, a higher proportion of males than females have fished in the past ( $73 \%$ males vs. $57 \%$ females).

Age
Among respondents who have not fished in the past 12 months, a higher proportion of middle-aged respondents ( $26-64$ years) have fished in the past when compared with respondents in other age groups ( $67 \% 26-35$ years, $69 \% 36-50$ years $70 \% 51-64$ years vs. $45 \% 18-25$ years, $57 \% 65+$ years).

Among respondents who have fished but not in the past 12 months, a higher proportion of middle-aged respondents ( $26-64$ years) than older respondents ( 65 years or older) indicate that they have not fished in the last 12 months due to lack of time ( $35 \% 26-35$ years, $45 \% 36-50$ years, $38 \% 51-64$ years vs. $17 \% 65+$ years). On the other hand, a higher proportion of respondents aged 65 and older than respondents in younger age groups indicate that they have not fished in the past 12 months due to age restrictions (e.g., too old) ( $37 \%$ $65+$ years vs. 0\% 18-25 years, $2 \% 26-35$ years, $3 \% 36-50$ years, $2 \% 51-64$ years) or health reasons ( $13 \% 65+$ years vs. $0 \% 18-25$ years, $2 \% 26-35$ years, $1 \% 36-50$ years, $4 \% 51-64$ years).

### 5.3.3 OPTIONS TO IMPROVE HUNTING/FISHING EXPERIENCE

Respondents who participated in hunting and fishing in the past 12 months were given a list of possible options and asked how likely these options are to provide them with a better hunting/fishing experience. Almost seven-in-ten ( $69 \%$ ) respondents provide likely $(4,5,6,7)$ ratings including approximately four-in-ten (43\%) very likely ( 6,7 rating) to have better hunting/fishing experience if provided with more opportunities near their home, followed by more areas with reduced vehicle access ( $63 \%$ likely, including $24 \%$ very likely), lower cost licenses or tags ( $58 \%$ likely, including $32 \%$ very likely), longer seasons ( $57 \%$ likely, including 30\% very likely) and higher bag limits ( $40 \%$ likely, including $15 \%$ very likely).

## Changes Over Time

An increased proportion of respondents who have gone hunting or fishing in the past 12 months indicate more opportunities near their home ( $43 \%$ vs. $32 \%$ in May 2008) and longer seasons ( $30 \%$ vs. $24 \%$ in May 2008) would be very likely (6,7 ratings) to provide them with a better hunting or fishing experience when compared with the results of May 2008.

A decreased proportion of respondents who have gone hunting or fishing in the past 12 months indicate that areas with reduced vehicle access ( $24 \%$ vs. $36 \%$ in May 2008) would be very likely ( 6,7 ratings) to provide them with a better hunting or fishing experience when compared with the results of May 2008.

## Sub-segment Analysis

## Region

Among respondents who have gone hunting or fishing in the past 12 months:

- A higher proportion of rural than urban respondents indicate that lower cost licenses or tags are very likely ( 6,7 ratings) to provide them with a better hunting or fishing experience ( $41 \%$ rural vs. $27 \%$ urban), and
- A higher proportion of those in the rural south indicate that higher bag limits are likely (4,5,6,7 ratings) to improve their hunting or fishing experience when compared with Calgarian respondents (50\% in rural south vs. 30\% in Calgary),
- A higher proportion of northern Albertans (Albertans in Edmonton and rural north) when compared with Calgarians indicate that higher bag limits are very likely ( 6,7 ratings) to improve their hunting or fishing experience ( $20 \%$ Edmonton, $22 \%$ in rural north vs. $8 \%$ in Calgary).

Age
Among respondents who have gone hunting or fishing the past 12 months:

- A higher proportion of younger respondents (18 to 25 years) indicate that lower cost licenses or tags are likely ( $4,5,6,7$ ratings) to provide them with a better hunting or fishing experience when compared with older respondents ( 36 years or older) ( $80 \% 18-25$ years vs. $47 \% 36-50$ years, $56 \%$ 5164 years, $51 \% 65+$ years), and
- A higher proportion of younger respondents (18 to 25 years) indicate that longer seasons would improve their hunting or fishing experience when compared with older respondents ( 51 years or older) ( $73 \% 18-25$ years vs. $47 \%$ 51-64 years, $46 \% 65+$ years).

## 6 CONCLUSIONS AND OBSERVATIONS

While a substantial proportion of Albertans are aware of the Alberta Conservation Association (ACA), awareness of the organization has not increased significantly since May 2008. Therefore, there still exists an opportunity to increase awareness, particularly top-of-mind awareness. Since awareness of ACA is higher in rural than urban Alberta, public awareness campaigns focused on Albertans in urban areas would have the greatest impact.

Positive public perceptions of ACA's conservation work have increased since May 2008. However, there is still substantial opportunity to increase these perceptions further, especially among those unaware of the ACA. Since rural Albertans tend to have more positive perceptions of conservation work done by ACA, increased visibility of the organization in urban centres may help to increase positive perceptions most dramatically.

Initiatives such as reducing the loss of native wildlife habitat and addressing the pollution of lakes and rivers would be well received by Albertans. Rural Albertans are also concerned with wildlife diseases. Other initiatives may require more public education in order to gain wide-range support.

Albertans are generally very supportive of outdoor activities, particularly hiking, nature photography, and canoeing. Since May 2008, Albertans demonstrate increased support for dog-walking, plant collection, motorized watercraft use, and off-highway vehicle use. Support for various outdoor activities varies substantially between different demographic groups.

Support for outdoor activities surpasses the proportion of Albertans that actually participate in the activities. However, self-reported participation of all the outdoor activities mentioned has increased since May 2008. While gains have been made, there is still potential opportunity for increased participation in these activities.

Those who have participated in hunting tend to have hunted in the past 12 months while those who have fished before tend not to have fished in the past year.

The main reasons for lapsed hunting and fishing participation have to do with loss of interest and lack of time. Current hunters and fishers indicate that have more opportunities to hunt or fish near home or an increase in areas with reduced vehicle access would improve their hunting or fishing experience. Slightly lower proportions indicate that lowered costs and extending seasons would improve their experience.

## 7 DEMOGRAPHIC PROFILE

Table 12: Demographics (Q.B, 11)

APPENDIX A: QUESTIONNAIRE

## ACA PUBLIC SURVEY

Hello, my name is $\qquad$ . I am calling you from Leger Marketing and we are conducting a survey to determine Albertans' feelings about various conservation issues affecting our province. We are not selling or promoting anything and all results will be kept completely confidential.
The survey will take about 7 to 8 minutes. May I speak with someone in your household who is 18 years of age or older and able to participate at this time?

1 RESPONDENT ABLE TO COMPLETE SURVEY: CONTINUE
2 NOT AVAILABLE: ARRANGE CALLBACK

## CONTACT INFORMATION IF REQUESTED:

Please contact Erfan Tabarsi of Leger Marketing if you have any questions about the survey, at 423-0708 in Edmonton, or 1-877-344-0444 toll-free.
A. Are you currently employed by any type of conservation organization?

8B) What are some of the reasons you have not participated in hunting in the past 12 months?

TOTAL ANSWERING
UNWEIGHTED BASE
Lost interest/ Change in interests/ habits/ 1ifestyle

Lack of time

Don't believe in hunting/ don't
like hunting/ don't support hunting
Age (e.g. too old)

No longer own guns/ don't have guns/ don't like guns

Regulations

Accessibility to the location
Health

No license/ expired license/ struggle to get license

Don't eat hunted meat/ no use for hunted meat

Don't know where to go

Reduce opportunity to harvest
Lack of training/ hard to get training
Cost

8B) What are some of the reasons you have not participated in hunting in the past 12 months?

Unsafe/ dangerous
Conservation concerns

Never hunted/ not a hunter
would rather watch the animals than
Quit/ retired/ just don't do it anymore
Don't know

LEGER MARKETING ALBERTA - ACA Public Opinion Survey 2011

9B) what are some of the reasons you have not participated in fishing in the past 12 months?

Too much pollution in water / Do not want to consume fish from water

No one to go fishing with

Fish stocks are low
Dislike of the catch and release program

No need to fish
Change of life/lifestyle

Too slow and boring
The weather
No good place to fish

Don't know

How to read: If sample is 500 then $4 \%$ could be plus or minus 1.7\% 19 times out of 20

Canadian Advertising Research Foundation, Media Research Standards Procedures, 1984.

[^0]:    *Less than $1 \%$ of respondents
